Summary

   The coyote team finished preparations for the PR and finished the final PR. After that, it supplemented the comment of the codes in GitHub and wrote GitHub Readme. Each part documented how to build and implement the environment for the part and uploaded it on GitHub Readme. In addition, the team recreated the flow chart for the entire project. Finally, in order to check the paper together as a whole, the team reviewed each other's parts to make better content. Overall, the team reviewed the grammar of all the papers and finished the project.
